## Projects

---

**Role:** Software Engineer

**March 2022 – August 2024**

**Company:** Savina Software Pvt Ltd,

Hyderabad

**Project:** Health Insurance System (HIS), New Jersey, US

### Project Description:

The Health Insurance System (HIS) is a comprehensive platform developed for New Jersey state citizens to apply for and manage various government-sponsored health and insurance programs. The system ensures personalized coverage based on key eligibility factors such as age, income, and family size, aiming to provide financial support and access to essential health services.

### Responsibilities:

To Developed responsive and dynamic user interfaces using **React.js**, **HTML5**, **CSS3**, and **Bootstrap**, ensuring a seamless user experience across all devices.

- Integrated **RESTful APIs** with the frontend for modules like insurance applications, eligibility checks, and claims management.
- Managed application state using **Hooks**, **Redux** and **Context API**, enabling consistent data flow across components.
- Implemented **component-based architecture** for code reusability and maintainability.
- Collaborated closely with backend developers to test and integrate APIs using **Postman**, ensuring smooth data communication.
- Applied **form validation**, conditional rendering, and dynamic UI updates based on user input and API responses.
- Ensured accessibility and responsiveness by following **modern UI/UX practices** and using **CSS flexbox** and grid systems.

## Education

---

**Sri Sarathi Institute of Engineering & Technology**

**2018**

Bachelor of Technology in Electronics & Commination Engineering (ECE)
