Profile Summary

Around **3 years** of experience as a Frontend Developer, **Specializing in React.js, JavaScript, CSS3, Bootstrap and HTML5. Proficient in building Scalable, responsive, web application** and collaborative software engineer with a proven track record of delivering high-quality software on time and within budget. **Seeking an opportunity to** apply my problem-solving skills and technical expertise to develop innovative, high-performance applications in a dynamic team environment.

Professional Experience

- **Proficient frontend developer** with strong expertise in **React.js, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, and Bootstrap**, building interactive and responsive web applications.
- Hands-on experience integrating **RESTful APIs** with React.js to ensure seamless communication between frontend and backend systems.
- Integrated many **RESTful APIs** into frontend applications and used **Postman** for API testing.
- Hands –on-experience in **State** management using **Hooks (useState, useReducer, useContent)** & **Global** state management **Redux Toolkit (Store)** for efficient data handling in large-scale applications.
- Used modern build tools like **Vite** and **Babel** for fast development and optimized builds.
- Proficient in **HTML5**, with good understanding of **semantic tags** to build accessible and **SEO-friendly web pages**.
- Proficient in **CSS3**, including **Flexbox ,CSS Grid & media Queries** for creating clean, flexible, and responsive layouts.
- Familiar with **Bootstrap** for quick and **mobile-first UI designs**.
- Worked in **Agile teams** using tools like **JIRA**, and used **Git/GitHub** for version control and collaboration.

Technical Skills

Programming Language: JavaScript, ES6+ Features

Library: React.js

UI : HTML5, CSS3

Tools: Git, Git hub.

IDEs: Visual Studio Code

State & Global Management : **Hooks** useState, useReducer, useContext & Redux Toolkit

Others: RESTful APIs, Postman, JIRA.

Projects

Role: Software Engineer

March 2022 – Nov 2024

Company: Savina Software Pvt Ltd,

Hyderabad

Project: Health Insurance System (HIS), New Jersey, US

Project Description:

The Health Insurance System (HIS) is a comprehensive platform developed for New Jersey state citizens to apply for and manage various government-sponsored health and insurance programs. The system ensures personalized coverage based on key eligibility factors such as age, income, and family size, aiming to provide financial support and access to essential health services.

Responsibilities:

To Developed responsive and dynamic user interfaces using **React.js, HTML5, CSS3**, and **Bootstrap**, ensuring a seamless user experience across all devices.

- Integrated **RESTful APIs** with the frontend for modules like insurance applications, eligibility checks, and claims management.
- Managed application state using **Hooks, Redux** and **Context API**, enabling consistent data flow across components.
- Implemented **component-based architecture** for code reusability and maintainability.
- Collaborated closely with backend developers to test and integrate APIs using **Postman**, ensuring smooth data communication.
- Applied **form validation**, conditional rendering, and dynamic UI updates based on user input and API responses.
- Ensured accessibility and responsiveness by following **modern UI/UX practices** and using CSS **flexbox** and **grid** systems.

Education

Sri Sarathi Institute of Engineering & Technology

2018

Bachelor of Technology in Electronics & Commination Engineering (ECE)
